

SUMMARY

IT Systems Administrator with 3+ years of experience managing enterprise IT infrastructure, Microsoft 365, Microsoft Entra ID (formerly Azure Active Directory), Google Workspace, Microsoft Intune, NinjaOne RMM, and Synology NAS environments. Experienced in cloud administration, endpoint management, identity and access management (IAM), Zero Trust security, IT operations, and backup and disaster recovery. Proven ability to design, administer, and optimize secure, scalable, and reliable IT environments through endpoint management, cloud administration, security compliance, automation, vendor coordination, and technical support.

CORE COMPETENCIES

Cloud & Identity

Microsoft 365
Microsoft Entra ID
Google Workspace
SharePoint Online
User Provisioning

Endpoint & Security

Microsoft Intune
NinjaOne RMM
Conditional Access
Multifactor Authenticator
Microsoft Defender
Endpoint Hardening

Infrastructure & Operations

Synology NAS
Active Backup for Business
Backup & Disaster Recovery
IT Asset Management
Vendor Management
IT Procurement

Software & Automation:

Python
Streamlit
Process Automation

DNS Management

DNS & SSL
WordPress
Technical SEO

Documentation

SOP Development
IT Documentation

PROFESSIONAL EXPERIENCE

IT Systems Administrator

(Official Title: IT Generalist)
Neun Farben Corp | 2023 – Present

Endpoint Management & MDM: Oversee the complete device lifecycle using Microsoft Intune and NinjaOne RMM. Execute remote laptop provisioning, automated application deployment (including specialized software like Autodesk Maya), centralized patch management, and continuous device health and compliance monitoring.

Cloud Infrastructure & Identity: Administer enterprise Microsoft 365, Azure AD, and Google Workspace environments. Enforce Zero Trust security principles by managing Conditional Access, MFA, and executing rigorous onboarding/offboarding workflows to ensure complete access removal and license recovery.

IT Asset Management & Compliance Auditing: Administer a dedicated, centralized asset tracking platform to manage end-to-end hardware and software lifecycles. Execute rigorous physical inventory audits, track user equipment assignments, monitor warranty expirations, and ensure strict license compliance across the organization.

IT Service Desk & Incident Response: Lead Tier 1 and Tier 2 technical support via NinjaOne ticketing and Discord administration. Actively monitor real-time network performance, antivirus threat alerts, and system vitals, serving as the escalation point for critical infrastructure incidents.

Data Continuity & Web Operations: Administer multi-site Synology NAS infrastructure, managing shared drive access, verifying automated backup completion, and executing file restorations. Maintain and test corporate WordPress websites, applying technical SEO and performance updates.

Key Internal Project: AI-Powered IT Asset & Finance Management Platformstem Architecture & Automation: Designed and deployed a Python/Streamlit enterprise web application to centralize IT procurement and budget forecasting. Integrated Google Gemini (Vision & NLP) to automate PDF invoice data extraction, optimize SaaS redundancies, and power a natural language financial chatbot. Engineered an intelligent multi-currency engine alongside a rolling 5-year interactive projection simulator with dynamic Plotly dashboards to visualize YoY spending trends. Developed full-cycle procurement tracking featuring automated 30-day SMTP renewal notices, immutable security audit trails, and rigorous role-based access controls. (Tech Stack: Python, Streamlit, Pandas, Plotly, Google Gemini AI, REST APIs, HTML/CSS).

IT Support / Cloud Administrator (Freelance)

HB Remedial Management OPC | 2025 – Present

Cloud Identity & Endpoint Management: Administered Google Workspace and deployed Google Credential Provider for Windows (GCPW) to enable seamless Single Sign-On (SSO). Enforced strict MDM policies using Endpoint Verification, mandating screen locks, blocking unauthorized USB storage, and restricting third-party apps.

Data Privacy & Security Governance: Served as the Data Privacy Officer (DPO) Champion. Architected the company's IT incident response framework (categorizing threats like Data Leaks and Malware), enabled advanced Gmail anti-phishing protocols, and enforced sensitive data protection rules to ensure regulatory compliance.

IT Automation & Remote Support: Developed an automated IT support ticketing system using Google Forms, Sheets, and custom Google Apps Script to instantly trigger end-user confirmations. Deployed Chrome Remote Desktop with strict permissions to provide secure, centralized technical support.

Infrastructure, Backup & Procurement: Managed end-to-end IT asset lifecycles by defining role-based hardware standards (RAM performance testing) and negotiating with vendors. Designed the company's data continuity strategy using a Synology NAS, overseeing automated disaster recovery, secure multi-platform access, and mobile integration.

Web & Digital Operations: Maintained and secured corporate WordPress websites, implementing HTTPS-validated secure forms, transactional customer care surveys, and technical SEO best practices.

Web Developer

Go Crayons | August 2022 – March 2023

- **Full-Stack WordPress Development:** Engineered and maintained responsive corporate websites, translating business requirements into highly functional and accessible digital platforms.
- **Custom Feature Engineering:** Programmed bespoke website functionalities and interactive front-end elements utilizing PHP and JavaScript to meet specific client needs.
- **Web Infrastructure & Security:** Administered hosting environments and web security, independently managing DNS zone records, SSL certificate deployments, and continuous site performance optimization.

IT Intern (On-the-Job Training)

Olivarez College Tagaytay | June 2022

- **Frontline Technical Support:** Delivered Tier 1 technical assistance to faculty and staff, actively diagnosing and resolving hardware, software, and local network connectivity issues.
- **Asset & Inventory Management:** Maintained comprehensive IT asset documentation, ensuring accurate hardware tracking and supporting the institution's device lifecycle management.
